

CENTAZ G8X

- CENTAZ G8X is a two-component high-viscosity polyurethane waterproof spray machine with an adjustable ratio system. Equipped with a powerful 7500W motor and an integrated heating system, it delivers stable, high-pressure spraying even with thick, demanding materials.
- The built-in heaters allow the G8X to preheat both A and B components, ensuring better mixing, smoother material flow, and faster curing—ideal for use in challenging environments such as tunnels, rooftops, basements, and large infrastructure projects.
- Dimension : 120 x 100 x 115 cm / 240 kg

Application :

- Painting for medium and large residential buildings
- Painting for commercial and industrial buildings
- General indoor and outdoor painting
- Latex painting
- Heavy-duty anticorrosion engineering
- Industrial epoxy floor coating
- Basic surface protection
- Fire protection engineering
- Waterproofing engineering

Technical Specifications :

Heater power	220 V heater power 5400 W x 2=10800 V
Power	7.5 KW 380 V 50 Hz
Max tip size	0.027 inch
Max flow rate	5.0 LPM
Max pressure	40 MPa
Adjustable ratio	3:1 / 2:1 / 5:4
